

WE'RE KEEPING BUSY!

Just because the doors at the dome close, it doesn't mean we slow down! During our closure, Science World is all around the province doing work, furthering our mission of closing the science gap and inspiring tomorrow's science and technology innovators.

What does that mean? Outreach programs for schools will take place in the Fraser Valley, Invermere, Campbell River and Victoria. And, at our Aberdeen Centre classroom in Richmond, we'll be offering more K-7 school workshops and free family drop-ins than ever before. Our education staff will also be working with teachers and early childhood educators and staging *Community Science Celebrations* in association with colleges and universities.

Where We'll Be and When

JANUARY

January 18 to February 4: *On the Road* visits in elementary and middle schools in Chilliwack, Abbotsford and Mission

January 22: *Iron Science Teacher* competition for high school teachers at the HR MacMillan Space Centre
