Innovative events demand creative settings and we offer you limitless options for your special meeting or gathering.

At Science World at TELUS World of Science we offer a unique venue unlike any other in the city. With the ability to accommodate from 20 to 1,400 guests, you'll be able to host any type of event. Enjoy a fun evening for employees and clients, or a sit-down formal dinner, buffet, or cocktail reception. In addition to built-in fun, you can enjoy outdoor spaces, hands-on galleries, and theatres that can seat up to 400. Our green roof and patio will also be a picture perfect location for weddings and other special events.

We offer a creative venue for a wide variety of special events. Due to the unique nature of the building and its operations, we'd appreciate that all our catering partners adhere to the following conditions.

RENTAL EQUIPMENT AND SUPPLIES

All rental equipment and supplies are to be delivered after 3 pm on the day of the event (including Saturdays and Sundays) to the Loading Bay. Science World assumes no responsibility for checking or counting items or ensuring their safety.

Teardown must occur immediately after the event and all rental or decor items removed from the building. If this is not possible, arrangements can be made to have the rental items left overnight in the Loading Bay. However, they must be picked up the following morning (including Saturdays and Sundays) between 8:30 am and 10:00 am.

MOVE-IN AND CLEANUP

Setup of events shall not begin prior to Science World's closing time, unless by special permission of the Facility Rentals Department. Closing time is 5 pm Monday through Friday and 6 pm on weekends, holidays and spring, summer and Christmas breaks.

At the end of the event, it is the responsibility of the caterers to conduct a thorough cleanup of all the areas used. All exhibit and public areas must be clear and clean for the next day's activities. Floors of all areas used as prep rooms must be swept and mopped and garbage removed from our premises. We will provide cleaning supplies.

Caterers will be charged for any cost incurred by Science World for unusual cleanup such as shampooing major stains on the carpet, removal of garbage left behind or any damages done to the premises.

FLOOR MATS AND COVERING

All bars, meat carving and coffee stations, temporary kitchen and clearing stations set up on the carpeted area shall have protective covering placed beneath and around them.

GARBAGE

All garbage must be bagged from areas where food has been prepared and served and taken away at the end of the event. Science World will supply replacement bags for the cans. If Science World's dumpster is used and extra pick up is necessary, the caterer will be invoiced for this. The dumpster outside the Triple O's loading bay is NOT to be used, as it belongs to the café operator.

SIGNAGE AND DECOR

All signage and decor brought in must be free standing. Signage and decor on exhibits and walls are not permitted. Only air-filled balloons (not helium) are permitted. Use of confetti and sparklers is prohibited. There is a restriction on the number of candles that can be used on tables. Relocation of exhibits is prohibited unless previously agreed to by Science World.

PARKING

Only the supply van may be parked outside the assigned area during the event. All other vehicles found parked around the building will be towed, as the promenade is considered a fire lane. Private vehicles of staff can be parked in the paid parking lots in front of the building or in the staff parking lot located south of the building, with prior approval of the staff in charge.

EVEREST

Visit the top of the world in this dramatic film produced in association with Science World. *Everest* takes you on an inspirational and spellbinding ascent with an international team of climbers who found hope, beauty, and triumph in the wake of tragedy. The film tells the dramatic true story of the expedition's journey to the summit, just days after the infamous 1996 tragedy in which eight climbers lost their lives.

SUPER SPEEDWAY

Super Speedway focuses on rising star Michael Andretti, his legendary father Mario Andretti and the work of Don Lyons — a restorer of vintage racing machines. The film follows the design, fabrication, and track testing of Michael's car and explores the technology and physics that will optimize the car's performance. As Michael's car is readied for the racing season, Don Lyons works steadfastly at reconstructing a vintage roadster out of an intriguing wreckage he has discovered in a dilapidated chicken coop. Only in time does the puzzle come together and the machine's illustrious identity becomes known.

THE LIVING SEA

Filled with exotic creatures and seafaring adventures, *The Living Sea* focuses on the fragile relationships between the ocean, its inhabitants and people. Surf thundering waves in Hawaii, swim with thousands of golden jellyfish, meet strange creatures living 3,000 feet below sea level, come face to face with humpback whales and witness the bizarre spawning behaviour of giant clams. *The Living Sea* uses powerful and beautiful images of unspoiled waters to demonstrate our dependence on healthy oceans. This film features songs and music by Sting and is narrated by Meryl Streep. (Nominated in 1996 at the Academy Awards for Short Documentary).

PULSE: A STOMP ODYSSEY

Is a celebration of the global beat, an exploration of the sights and sounds of continents and cultures, guided by the internationally acclaimed performers of the sensational stage show STOMP. Audiences will travel a world brought brilliantly alive on the large-format screen and will discover the universal language of rhythm.

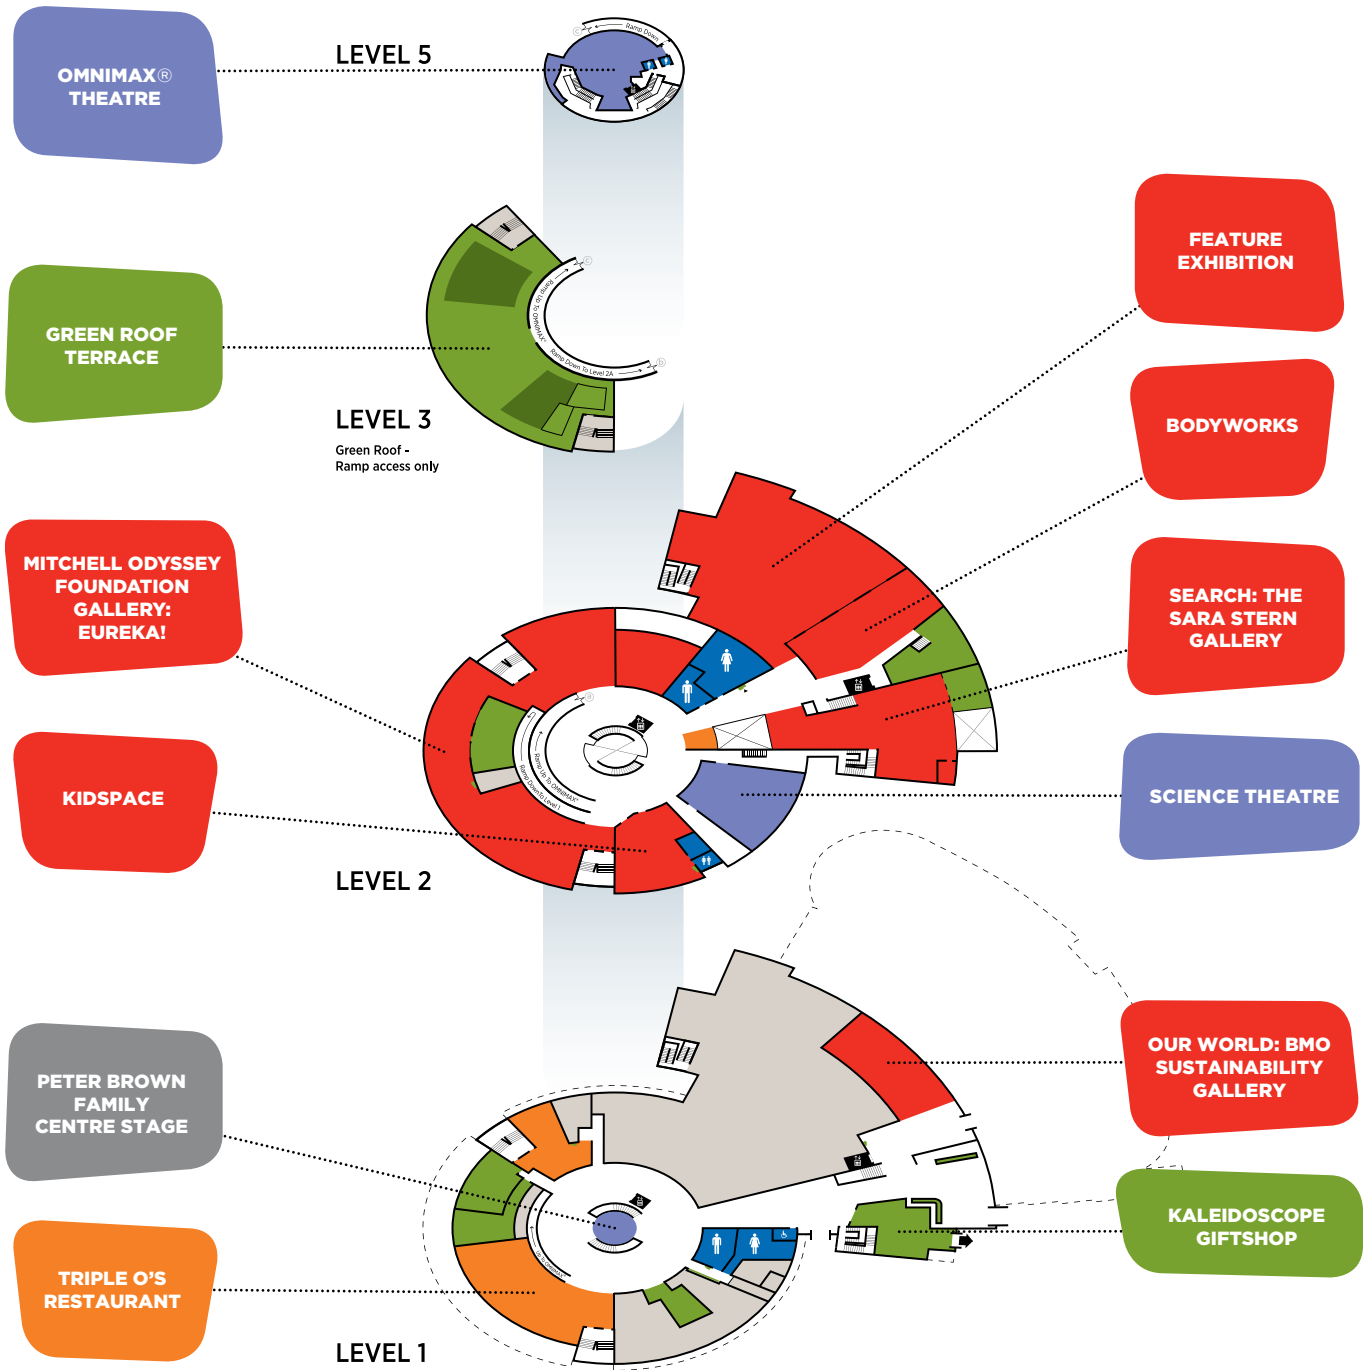

JOURNEY INTO AMAZING CAVES

Descend into worlds with no light, no air, and no room for error. Follow the story of Nancy Aulenbach and Dr. Hazel Barton as they boldly explore ice caves in Greenland and underwater caves in the jungles of Mexico.

BEAVERS

Beavers was the first film shown in Science World's OMNIMAX® Theatre in 1989 when we first opened. Plunge into the habitat of one of nature's greatest engineers for an intimate look at a family of beavers as they grow, play and transform the world around them.
