Homegrown Extreme Dinosaurs roar to life in their world premier at Science World at TELUS World of Science

(Vancouver, BC)— On Saturday, July 30, Science World at TELUS World of Science opens the doors to the world premier of *Extreme Dinosaurs*, the first exhibition to find a home in Science World's new 10,000 square foot travelling exhibition space.

Presented by BMO, *Extreme Dinosaurs* is created by Vancouver-based Dinosaurs Unearthed and Science World British Columbia. It features 19 life-size animatronic dinosaurs and two full-scale articulated skeletons along with 12 fossils and a range of interactive activities. *Extreme Dinosaurs* includes a life-sized animatronic *Kosmoceratops*, a relative of a triceratops, with what is possibly the most ornate skull known to any dinosaur.

In addition to *Kosmoceratops*, *Extreme Dinosaurs* gathers some of the world's strangest dinosaurs and gives visitors the inside scoop on their unique looks and how some may have been related to birds instead of reptiles. The dinosaurs come to life with blinking eyes, moving limbs, gnashing teeth, and thundering roars.

"We're extremely excited and proud to be premiering this exhibit with our partners at Science World," says Jennifer Chow, Business Development Manager of Dinosaurs Unearthed. "Our dinosaur exhibits have been captivating audiences all over North America, but being able to bring this new experience to our hometown is really something special."

This is the first exhibition to open in Science World's new 10,000 square foot feature gallery space — the first space to be fully completed in a \$35 million expansion and renovation which began in early 2010. The feature gallery has been increased by an amazing 66% to allow for bigger, more mind-blowing exhibitions.

"As the *Extreme Dinosaurs* presenting sponsor, BMO Financial Group has the opportunity to reach out to our customers and the general public in a way that is fun, educational and interactive," says Joanne Gassman, senior vice president, BC and Yukon Division, BMO Bank of Montreal. "It is a wonderful and creative way to involve ourselves in the Vancouver community; we hope everyone has a chance to see the exhibit over the next eight months."

About Science World

Science World British Columbia is a charitable non-profit organization which engages British Columbians in science and inspires future science and technology leadership throughout our province.

About Dinosaurs Unearthed

Based in Vancouver, British Columbia, Canada, Dinosaurs Unearthed is an industry leading traveling exhibit company that specializes in cutting-edge interactive and animatronic dinosaur exhibits. Founded in 2006, the Company develops unique exhibits for museums, science centres, theme parks and zoos throughout North America.
