Science World Launches Its Newest Exhibition Math Moves! This Saturday

FOR IMMEDIATE RELEASE

September 20, 2017 (Vancouver, BC) - Science World presents *Math Moves!*, a collection of 20 unique exhibits in a 5,000 square foot space that allows users to playfully engage with math using their bodies. The exhibition runs from Saturday, September 23 to January 1, 2018 at TELUS World of Science.

Math Moves! visitors will investigate ratios and proportions, using their bodies, gestures, and words to set up, measure, describe and compare ratios and proportions. The exhibition encourages a collaborative approach to problem-solving, with open-ended activities that provide opportunities for visitors to talk about solutions to the challenges presented in the exhibition.

“This is a great opportunity for kids to learn an innovative approach to math that engages all their senses,” said Scott Sampson, President, and CEO of Science World. “*Math Moves!* is a playful, full-body exploration of ratios, proportions and other fundamental math concepts. The skills children learn at this exhibition will provide them with the tools and confidence they’ll need for years to come.”
