OUR MISSION

Through science and nature,
we ignite wonder and empower dreams.

OUR VISION

Within a generation, Canada will be a country
of thriving, sustainable communities rooted in
science, innovation and a deep connection to nature.

CHAIR & CEO REPORT

In my fourth year as Chair, I've never been prouder to present to you Science World's Annual Report!

This year brought challenges and obstacles that none of us has ever experienced in our lifetime. When Science World closed due to COVID-19, there was a fear that it wouldn't open again. It was difficult for people to imagine Vancouver and BC without a Science World—for many of our visitors and members, it's been a mainstay of their lives since they were kids. In the days and weeks that followed our closure, as the media shared stories about our precarious financial situation, these people stepped up to declare their support for our organization. The outpouring of support we experienced, not just for the galleries and exhibits at the dome, but also for the staff, the programs, and our outreach across BC, was a source of encouragement and motivation during a difficult time.

Buoyed by their support, the Science World team did what scientists do best—put their heads together and figured out how to solve a problem. The ingenuity and resilience demonstrated by each person within the organization deserve recognition. The highlights presented here in our 2020/2021 Annual Report are a testament to what's possible when people work together toward a common goal.

Launi Skinner
Chair

CHAIR & CEO REPORT

Joining Science World as President & CEO during the COVID-19 era, I knew it would be a challenging road to navigate. During the closure, the team spent months thinking about how to adapt our hands-on exhibits and how to reopen safely. We took down some of our most beloved experiences, including the OMNIMAX® Theatre. But reopen we did, thanks to the dedication and perseverance of our amazing staff.

Things have, of course, changed. Gone are the days of 5,000 visitors, excited school groups, interactive science shows, and families gathering in Wonder Gallery. It's a quieter, more personal experience now. And it has to be.

As we explore new ways of being open, and new ways of reaching children—wherever they're learning from—it's imperative that we continue to support them, and our teachers. Science World has led STEAM-based learning for decades, all over the province. It's what we do at our core. We have big plans to adapt and expand our online learning and to upgrade our exhibits and visitor experiences at the Dome. We can't wait to share them with you.

We are here today because of the incredible support of our Board, Advisory Council, donors, partners, sponsors, Members, visitors, and of course, the Science World staff. I want to thank each of them for their hard work and commitment to igniting wonder and empowering dreams for the next generation of nerds.

Tracy Redies

THE WORLD NEEDS MORE NERDS

In the spring of 2020, we tuned into Dr. Bonnie Henry's updates every day and banged our pots and pans every night to loudly declare our gratitude for frontline workers. We read about the healthcare professionals keeping us safe, the researchers developing vaccines, and the science communicators guiding us through a global health crisis. At Science World, our mission had never seemed more essential. The world was relying on STEAM heroes, and it was our job to inspire them at a young age.

The award-winning independent creative agency Rethink agreed. They offered to build us a fundraising campaign and generously donated all of their time for free. Creative sparks flew when Rethink's Creative Director Leia Rogers saw the grade school photo of a young, bespectacled Dr. Bonnie Henry. It was a perfect time to celebrate extraordinary humans in STEAM for what they were: nerds.

"A nerd is someone who loves what they love, no matter what. They bring passion, wonder and curiosity to everything they do. Problem solvers. Wonder seekers. World changers."

When the campaign launched, Dr. Bonnie Henry's image went viral across Canada and beyond. Hundreds of donations came in. As we rolled out more and more stories and photos of both famous and local nerds on social media, many self-proclaimed nerds joined in on the fun. They shared their nerdiest anecdotes and agreed enthusiastically that, yes, The World Needs More Nerds.

NERDS, L-R:

Dr. Bonnie Henry, age 7; **Dr. Love-Ese Chile**, age 7; **Dr. Theresa Tam**, age 9;
Col. Chris Hadfield, age 4; **Dr. Jane Goodall**, age 6; **Ken Wu**, age 4;
Edoye Porbeni, age 7; **Dr. Carl Hansen**, age 6.

THE WORLD NEEDS MORE NERDS

We are grateful to all campaign donors, including the following people for their very generous gifts:

Jesse & Erica Houston

A group of Ecotagious founders including the Berkowitz, Handford, Townson-Carolan & Walsh-Brownridge families

iA Financial Group

Jeff and Sonia Hobbs

NERDS, L-R:

Lianna Mah, age 8; **Jesse Houston**, age 5; **Dr. Ajung Moon**, age 7; **Dr. Ali Tehrani**, age 4; **Dr. Tammara Soma**, age 2; **Andrew Booth**, age 7; **Ann Makosinski**, age 5; **Stewart Butterfield**, age 10; **Humaira Ahmed**, age 3; **Laurent Duvernay-Tardif**, age 1; **Vienna Lam**, age 4; **Bethany Downer**, age 4.

"Science World is the start of training the next generation of talented and educated people who appreciate the beauty of science. I'm happy to be a supporter and I'm happy to be a loud voice."

—Dr. Ali Tehrani, President & CEO, Zymeworks

TOWERS OF TOMORROW WITH LEGO® BRICKS

Towers of Tomorrow with LEGO Bricks, Science World's Feature Exhibition presented by Concert Properties and White Spot Restaurants and supported by TransLink, had original run dates of January 24, 2020 to September 24, 2021. Due to COVID-19, the show and all our sponsor partnerships were generously extended until January 2021.

This captivating exhibition featured 20 of the world's most astonishing skyscrapers from around the globe, constructed on a scale of 1:200 with breathtaking architectural detail and accuracy by Australia's Ryan McNaught, the only LEGO Certified Professional in the Southern Hemisphere. Helping install the exhibition was Canada's first LEGO Certified Professional, BC's own Robin Sather, our *Towers of Tomorrow* spokesperson. Families loved exploring architecture and engineering, building their own creative structures with the 200,000 LEGO pieces provided.

IMPACT

144,500 visitors to the dome

2,048,544 visitors to
Science World online

27,529,985 media impressions

Tech-Up reaches students and teachers across BC with free virtual coding and computational-thinking skills and resources that they'll need to succeed in today's economy. One of our most successful online pivots, a suite of new reservable online programs has been designed by education specialists to reflect BC's transformed curriculum. As Science World continues to develop new ways to ignite wonder in learners, *Tech-Up* serves as a shining example for how remote learning can be relevant, fun, barrier-free, and hands-on.

IMPACT

887 teachers received free professional development.

9,614 students received free coding and computational-thinking workshops.

"I am extremely appreciative, especially during this time when we are not able to do field trips, that Science World was able to come into our classroom, especially with the focus of coding. It was very inspiring to my students. Josh was an awesome facilitator...patient, encouraging, knowledgeable and enthusiastic. Many of my students now want to be 'coders'! Many, many thanks!"

—Teacher participant in *Tech-Up* workshop

Dr. Bonnie Henry, poster child for The World Needs More Nerds campaign, made the third annual Girls and STEAM one of the brightest highlights of 2020! As keynote speaker reaching both our on-site and online participants, she celebrated the girls for their resilience during the pandemic and spoke of overcoming her childhood shyness by following her curiosity: "Find what you think is interesting, and be OK with that."

On-site, girls attended workshops with STEAM educators from Douglas College, Girls Exploring Physics, New Media Gallery and SCWIST, while online participants attended workshops with Genome BC and BCIT Engineering. Virtual breakout rooms facilitated panel discussions, including our popular Star Mentorship Panel featuring Cybele Negrís of Webnames.ca, Nicole Quinn of STEMCELL Technologies and Cheryl Neal of IBM Canada Ltd. Finally, marine biologist Dr. Sarika Cullis-Suzuki closed the day with an inspiring speech about her advocacy for ocean health and climate change awareness: "I use my voice to speak out about what is important, and this is what I encourage you to do as well."

"I really enjoyed this opportunity because it brought awareness to issues and opportunities for young girls and STEAM...It opens their eyes to career possibilities and makes them feel hopeful that their values and interest can align with their career aspirations."

—Parent of 2020 Girls and STEAM participant

For 10 years, *Future Science Leaders (FSL)* has engaged teens in the Lower Mainland with advanced STEAM skills and knowledge unavailable in regular high school settings. This year, a successful online transition allowed participants to continue learning from experts and professionals while making life-long connections with mentors and peers. The 2020/2021 cohort promises to be a responsive, resilient and creative group of world-changers.

IMPACT

102 participants, our highest enrollment ever, participated in *FSL* Vancouver and Surrey.

Our first-ever online guest speaker series featured weekly talks from professionals across the scientific community, such as: JPL engineers from the Perseverance Rover; a SpaceX rocket engineer; an AI expert; a UBC professor of pathology; COVID-19 researchers; and an online fieldtrip to the David Hardwick Pathology Learning Centre.

"This year of *Future Science Leaders* was an amazing experience for me. I developed soft and hard skills that applied to my school and the outside world. Blogging for *FSL* expanded my communication skills and taught me how to produce engaging content for a media club I co-founded during the pandemic. I also treasured the lectures given by professionals, students, and professors from various backgrounds that inspired me to explore my passions in astronomy, medicine, technology and more. Not only did I enjoy my own personal journey, but I also loved working with like-minded peers."

—Current *FSL* participant

In its 20th year, *Super Science Club* delivered a brand-new online experience with the same important goal—to inspire a love for science in kids attending underserved schools and community centres in Vancouver. The transition to virtual learning enabled 5 terms of weekly online sessions full of fun demonstrations, hands-on activities, and creative projects. The theme this year was “Connections, big and small,” and sessions helped students investigate the impacts their choices have on the environment. At the end of each term, participants were treated to a high-energy celebratory live-streamed science show! And each student received a free Family Membership to Science World for 1 year.

IMPACT

780 participants

14 schools

3 community centres

47 home learners

378 Family Memberships distributed

"The instructors' enthusiasm and patience made the experience of science joyful. They sparked my children's imagination and investigative spirit. To have this resource, especially during this pandemic, was invaluable to them. Thank you."

—Parent of participant
of *Super Science Club*

Scientists and Innovators in Schools (SIS) promotes science and technology in elementary and secondary students throughout the entire province. Prior to COVID-19, dedicated volunteers from various fields traveled to schools across BC, stimulating an interest in science and technology in a fun and exciting way. This year, Science World tested an online version of the program, and brought the world of STEAM into classrooms despite the many barriers of the pandemic. After a successful pilot, we look forward to scaling this important program so that students in every region of BC get exposure to the possibilities of careers in science, inspiring role models and invaluable mentorships.

IMPACT

847 people received in-person visits in March 2020.

410 people received an online visit during our pilot of virtual *SIS*.

"I would love to participate in the program again in the future. It's always better to do these things in person, but it did work, and the students were engaged. We were so lucky to have Jake 'visit' our classroom, especially since all field trips have been cancelled, and learning has been so unusual this year."

—Teacher participant in *SIS*

BC Green Games (BCGG) is a digital eco-storytelling contest that links closely with British Columbia's new curriculum and supports teachers in promoting place-based environmental education. It was designed to inspire positive change in schools and communities by increasing student awareness of environmental issues and fostering students' ability to become sustainability leaders. The program ran until March 2020 and had received a record number of 296 contest submissions—up 100% from the previous year. While the pandemic has momentarily paused *BCGG*, we look forward to renewed purpose and enthusiasm when we are able to welcome the next province-wide cohort of young passionate environmental leaders.

IMPACT

6,144 students participated.

293 projects

This was a truly transformative year for one of our oldest programs, *On The Road (OTR)*. When in-school visits were no longer possible, the *OTR* team worked quickly and tirelessly to figure out how to keep sparking wonder in kids who might otherwise not be able to access Science World programming. A number of solutions were formulated and tested. The result of this experimentation is a number of new creative offerings that can help fill the gaps created by the pandemic. First, *Online Science Adventures* are custom science shows that stream from our new film studio in the dome to schools and students across BC. Second, our public virtual shows are available for everyone to livestream from their devices where they can interact with the performers, ask questions and make comments. Finally, the short, engaging videos of Show Us Your Science (available online, anytime) feature our talented facilitators unpacking fascinating science phenomena.

IMPACT

4,008 people at in-person *On The Road* shows (before restrictions).

1,673 people received *Online Science Adventures*.

11,467 views of our public livestream shows.

To be named a Friend of Science World is an honour bestowed by the Membership of Science World on an individual who personifies the goals and aspirations of the Society. The recipient is characterized by a love of science, a dedication to community service and a commitment to the evolution of British Columbia as an international centre of science and technology. Either through their activities on behalf of the Society and/or by the example they provide by their life's achievements, Friends have contributed significantly to the development of a science culture in our province.

PATRONS OF SCIENCE WORLD

To be named a Patron of Science World is an honour bestowed by the Members of the Science World Society on a volunteer or former employee, who has contributed in a significant way to the development of the Society.

The Society recognizes that a community facility like Science World can only thrive if it is the recipient of the collective contributions of energy, wisdom, time, financial resources and goodwill from the leaders of the community it serves. The Patrons of Science World are examples of this leadership.
