Innovative events demand creative settings and we offer you limitless options for your special meeting or gathering.

Science World offers a venue unlike any other in the city. With the ability to accommodate from 20 to 1,800 guests, you'll be able to host any type of event. Enjoy a fun evening for employees and clients, or a sit-down formal dinner, buffet, or cocktail reception. In addition to the dining option, you can enjoy outdoor spaces, hands-on galleries as well as a 200 seat and a 400 seat theatre. Our Green Roof Terrace and patio is picture perfect and a great location for weddings and other special events.

We offer a creative venue for a wide variety of special events. Due to the unique nature of the building and its operations, we'd appreciate that all our catering partners adhere to the following conditions:

RENTAL EQUIPMENT AND SUPPLIES

All rental equipment and supplies are to be delivered to the loading bay, or assigned area, before 10am on the day of the event (including Saturdays and Sundays). Any deliveries after 10am must use the bus lay-by lane in front of the building and all items must be hand-trucked into the loading bay or assigned area. Science World assumes no responsibility for checking or counting items or ensuring their safety.

Teardown must occur immediately after the event and all rental or decor items removed from the building. If this is not possible, arrangements can be made to have the rental items left overnight in the loading bay. However, they must be picked up the following morning (including Saturdays and Sundays) between 8:30am and 10am.

MOVE IN AND CLEAN UP

Setup of events shall not begin prior to Science World's closing time, unless by special permission of the Facility Rentals Department. Closing time is 5pm Monday through Friday. Closing time is 6pm on weekends, holidays and during spring, summer and Christmas breaks. We are closed Mondays from September to March.

At the end of the event, it is the responsibility of the caterers to conduct a thorough clean up of all the areas used. All exhibit and public areas must be clear and clean for the next day's activities. Prep room floors must be swept and mopped and garbage removed from our premises. We will provide cleaning supplies. Caterers will be charged for any costs incurred by Science World for unusual clean ups such as shampooing major stains on the carpet, removal of garbage left behind or any damages done to the premises.

FLOOR MATS AND COVERING

All bars, meat carving and coffee stations, temporary kitchen and clearing stations set up on the carpeted area must have protective mats and floor coverings placed beneath and around them.

GARBAGE

All garbage from areas where food has been prepared and served, must be bagged and taken away at the end of the event. Science World will supply replacement bags for the cans. If Science World's dumpster is used and requires an extra pick up, the caterer will be invoiced for this. The dumpster outside the Triple O's loading bay is NOT to be used, as it belongs to the café operator.

SIGNAGE AND DECOR

All signage and decor brought in must be free standing. It is prohibited to attach signage or decor to exhibits or walls. No helium balloons are allowed. Only air-filled balloons are permitted. Use of confetti and sparklers is prohibited. There is a restriction on the number of candles that can be used on tables. Relocation of exhibits is prohibited by caterers unless previously agreed to by Science World.

PARKING

Only the supply van may be parked outside the assigned area during the event. All other vehicles found parked around the building will be towed. Catering staff vehicles can be parked in the paid parking lots in front of the building.

EVEREST

Visit the top of the world in this dramatic film produced in association with Science World. Everest takes you on an inspirational and spellbinding ascent with an international team of climbers who found hope, beauty and triumph in the wake of tragedy. The film tells the dramatic true story of the expedition's journey to the summit, just days after the infamous 1996 tragedy in which eight climbers lost their lives.

SUPER SPEEDWAY

Super Speedway focuses on rising star Michael Andretti, his legendary father Mario Andretti and the work of Don Lyons—a restorer of vintage racing machines. The film follows the design, fabrication and track testing of Michael's car while exploring the technology and physics that will optimize the car's performance. As Michael's car is readied for the racing season, Don Lyons works steadfastly at reconstructing a vintage roadster out of an intriguing wreckage he has discovered in a dilapidated chicken coop. Only in time does the puzzle come together and the machine's illustrious identity becomes known.

THE LIVING SEA

Filled with exotic creatures and seafaring adventures, The Living Sea focuses on the fragile relationships between the ocean, its inhabitants and people. Surf thundering waves in Hawaii, swim with thousands of golden jellyfish, meet strange creatures living 3,000 feet below sea level, come face to face with humpback whales and witness the bizarre spawning behaviour of giant clams. The Living Sea uses powerful and beautiful images of unspoiled waters to demonstrate our dependence on healthy oceans. This film features songs and music by Sting and is narrated by Meryl Streep. (Nominated in 1996 at the Academy Awards for Best Documentary, Short Subjects).

PULSE: A STOMP ODYSSEY

Pulse: A STOMP Odyssey is a celebration of the global beat. It explores the sights and sounds of continents and cultures, guided by the internationally acclaimed performers of the sensational stage show, STOMP. Audiences will travel to a world brought brilliantly alive through this large-screen format and will discover the universal language of rhythm.

BEAVERS

Beavers was the first film to be shown in Science World's OMNIMAX® Theatre, in 1989. Plunge into the habitat of one of nature's greatest engineers for an intimate look at a family of beavers as they grow, play and transform the world around them.
